CAREER OBJECTIVE

Computer Science and Engineering student focused on full-stack web development, clean backend logic, and responsive UI design. Experienced in building functional web applications using Python and PHP, with a strong interest in software engineering and data analysis. Proven ability to work under tight deadlines and build quick prototypes — recently demonstrated by securing an internship offer during a 24-hour university hackathon. Looking to apply my development, data handling, and problem-solving skills in a challenging fresher role within a progressive technology team.

TECHNICAL SKILLS

- Programming Languages: Python (Strong conceptual understanding), PHP
- Web Development: Full-Stack Development, Frontend UI Building, Backend Logic, Relational Databases
- Technologies & Databases: HTML5, CSS3, JavaScript, MySQL
- Tools & Environments: XAMPP (Apache, MySQL), Git, GitHub
- Design & Editing: Figma UI, Canva, Graphic Design, Video Editing
- Domain Foundations: Data Science, Machine Learning, Automation Systems

HACKATHONS & ACHIEVEMENTS

Industry Innovation Hackathon (2026)

Sathyabama Institute of Science and Technology

- Project: Skill Forge — Built during a continuous 24-hour development timeline.
- Outcome: Received a direct Internship Offer from the evaluation panel based on the project's functionality and code structure.
- Key Tasks: Worked under a strict 24-hour limit to design, code, and present a working prototype aimed at solving skill gap issues in education. Handled real-world bugs quickly and demonstrated strong technical endurance throughout the sprint.

PROJECTS

Skill Forge

Hackathon Web Prototype

Role: Developer & UI Designer | Technologies: HTML, CSS, JavaScript, AI API Integration, JSON / Data Structures

Developed an application prototype designed to bridge the gap between student skills and industry requirements, built entirely within a 24-hour live hackathon sprint.

- Designed a clean, single-page interface from scratch under strict time constraints to showcase core features clearly.
- Integrated an AI model via API to dynamically analyze a user's current skill level and generate personalized learning paths based on their technology profile.
- Structured and fed clean dataset inputs — including technology tags, skill levels, and job roles — into the AI engine to ensure accurate, context-aware recommendations.
- Fixed styling anomalies and functional interface bugs on the fly during the live coding phase.
- Key Learnings: Built an AI-assisted prototype quickly, managed development time under intense pressure, and learned how to feed structured data to an AI model to achieve predictable, reliable outputs.

Job Management Portal

LinkedIn-Style Full-Stack Web App

Role: Solo Developer & UI Designer | Backend: PHP, MySQL (XAMPP) | Frontend: HTML, CSS, JavaScript

Built a functional web portal designed to connect job seekers directly with recruiters through an easy-to-use platform. The portal supports user registration, login, profile management, job posting, job searching, and application tracking.

- Designed a responsive frontend interface from scratch to ensure the portal works smoothly across mobile and desktop screen sizes.
- Programmed backend registration, login systems, and secure user authentication using PHP and server-side validation logic.
- Set up a relational MySQL database to store user profiles, job posts, search keywords, and application statuses.
- Hosted and tested the entire application locally on a XAMPP server to identify and resolve server-side configuration issues.
- Key Learnings: Gained clear, practical experience with client-server communication, form validation, database mapping, and writing clean, maintainable code.

INTERNSHIPS

Frontend Development Intern

Techovolt, Coimbatore

- Translated UI wireframes into clean, working web pages ready for production review.
- Optimized layouts to ensure web applications run smoothly on both mobile and desktop screens.
- Gained hands-on experience with visual hierarchy principles and basic user testing workflows.

Data Science Intern

RINEX Software, Bangalore

- Learned foundational data operations including cleaning raw datasets and handling missing or inconsistent records.
- Wrote basic data scripts to sort information and surface patterns that support data-driven decision-making.

Machine Learning Intern

RINEX Software, Bangalore

- Studied predictive models, training workflows, and algorithm selection for different types of technical problems.
- Worked with standard performance metrics to evaluate and compare model accuracy.

WORKSHOPS & TRAINING

Recent Trends in Technical World — AI

SIMATS Engineering College

- Examined current AI development trends and how automated tools are changing the software engineering landscape.

Connected: END-TO-END IoT Solution

PSG College of Technology

- Learned about sensor networks, data routing pipelines, and connecting hardware devices to cloud setups.

Advanced Automation Technology (AAT) for E-Mobility

Erode Sengunthar Engineering College

- Covered smart microcontrollers and automated software trends used in electric vehicle systems.

EDUCATION

B.E. Computer Science and Engineering

2023 – 2027

Erode Sengunthar Engineering College, Tamil Nadu | Current Academic Aggregate: 85%

- Core Coursework: Object-Oriented Programming, Database Management Systems, Data Structures, Web Design, Software Engineering.

Higher Secondary Certificate (H.S.C.)

2021 – 2023

Adharsh Vidhyalaya Matric Hr.Sec.School | Final Score: 65%

- Subjects: Mathematics, Physics, Chemistry, Computer Science.

LEADERSHIP & EXTRA-CURRICULAR ACTIVITIES

- Student Coordinator — Event Management: Managed organizational tasks, planned event resources, and coordinated schedules across student teams.
- Core Competencies: Logical problem solving, quick learning capability, and handling multiple tasks comfortably under tight deadlines.
- Additional Interests: Handcrafting, graphic design, and video editing.

LANGUAGES

- English: Professional working proficiency — technical communication and written documentation.
- Tamil: Native fluency.
